

WASSERPROJEKT

im Hochland der Maasai

März/April 2026

Kipambi Primary School

Kipambi Village - MAASAI LAND

Wasser für 450 Kinder und ein Maasai-Dorf

In einer lokalen Maasai-Schule im Dorf Kipambi, Loliondo, wurden zwei Wassertanks und Regenrinnensysteme installiert.

Dadurch erhalten Lehrer und über 450 Kinder sauberes und zuverlässiges Regenwasser. Zuvor war die Schule auf unsichere Wasserquellen angewiesen, die sie sich mit Wildtieren und Nutztieren teilten.

Die Region um Kipambi leidet jährlich bis zu fünf Monate unter Dürre und der Zugang zu Wasser ist aufgrund des Fehlens von Flüssen in der Nähe extrem schwierig.

AQUA PEARLS

Darüber hinaus wurde im Dorf Sukenya ein Wassertank mit Regenrinnensystem installiert, sodass diese Menschen nun von zu Hause sicher Zugang zu sauberem Wasser haben.

Diese Projekte haben die Gesundheit, die Hygiene und den Alltag sowohl der Schulgemeinschaft als auch der Familien im Dorf deutlich verbessert.

4.4.2026 You brought a happiness to our life. Water is life.
So technically you gave them life. Many blessings from Maasai land.

BWT – Austria

This is where the children were getting water from before water tank installed.

27.4.2026

The community and even the government are very happy and thankful.

Two more schools teachers came to me after this project asking for water harvesting tanks.

Community during handing them the project.

Two water tanks and gutter systems were installed at a local Maasai school in Kipambi village, Loliondo, providing clean and reliable rainwater to teachers and over *450* children. Previously, the school depended on unsafe water sources shared with wild animals and livestock.

Kipambi area faces drought for up to five months each year, and access o water is extremely difficult due to the lack of nearby running rivers.

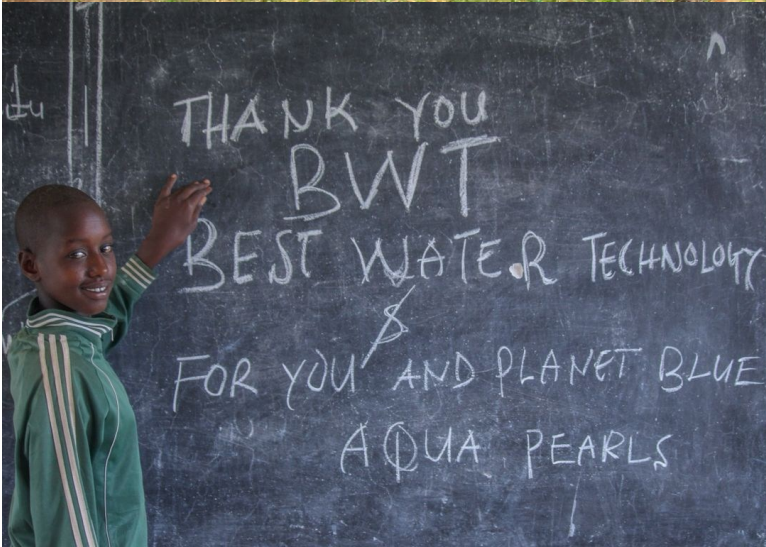

In addition - one water tank and gutter system were installed for familys in Sukenya village, giving them safe access to clean water at home.

These projects have significantly improved health, hygiene, and daily life for both the school community and the family.

**MAASAI PEOPLE — THANK YOU
AQUA PEARLS and BWT**

Classrooms - water for children

HAPPY FACES AFTER CLEAN WATER

After the district educational office posted this project on their page I have many school teachers writing to me asking for water tanks.

One teacher even came to see me in the village to see our project.
